

Mercer CoreSeries Active Growth Portfolio

for financial advisers

Investment objective

The portfolio aims to achieve an Inflation (Consumer Price Index) + 4% pa objective over rolling six year periods by taking exposures to a mix of growth and defensive asset classes.

Investment strategy

The strategy is an actively managed diversified portfolio investing in both growth asset classes such as equities, property and infrastructure, and defensive asset classes such as cash and fixed interest securities. The portfolio's exposure will typically be 85% growth assets and 15% defensive assets; however over time these allocations may deviate within a range due to market movements and asset allocation decisions. These exposures are expected to provide a return in excess of inflation over the long-term and aim to minimise the impact of shorter-term market volatility through asset diversification, manager selection and risk management.

Asset Breakdown

● Australian Equities	35.6%
● International Equities	38.6%
● Property & Infrastructure	10.4%
● Australian Fixed Interest	4.1%
● Global Fixed Interest	4.6%
● Cash and Money Market	6.7%

Breakdowns are for illustrative purposes only. Percentages may not always add up to 100% owing to rounding.
