

# Mercer CoreSeries Active High Growth Portfolio

## Investment strategy

The strategy is an actively managed diversified portfolio investing in predominately growth asset classes such as equities, property and infrastructure. The portfolio's exposure will typically be 97% growth assets and 3% defensive assets; however over time these allocations may deviate within a range due to market movements and asset allocation decisions. These exposures are expected to provide a return in excess of inflation over the long-term and aim to minimise the impact of shorter-term market volatility through asset diversification, manager selection and risk management.

## Investment objective

The portfolio aims to achieve an Inflation (Consumer Price Index) + 4.5% pa objective over rolling seven year periods by taking exposures to mix of growth asset classes.

## Asset Breakdown

● Australian Equities	39.0%
● International Equities	49.3%
● Property & Infrastructure	9.0%
● Cash and Money Market	2.8%

Breakdowns are for illustrative purposes only. Percentages may not always add up to 100% owing to rounding.
